

Product Vision is a high-level strategic statement that defines the long-term direction of a product. It explains why the product exists, who it is built for, what problem it solves, and the value it aims to deliver. It serves as a guiding reference for all product decisions throughout the product lifecycle.

Vision

Product Name	AI Video Production Assistant
Vision Statement	Become the trusted AI-powered assistant that helps content creators make better production decisions by generating personalized AI video production plans based on their goals, budget, and requirements.
Long-term Vision	Become the go-to platform for AI video production guidance, helping creators save time, reduce costs , and consistently produce high-quality AI-generated content.

Target Users

Primary User	AI Content Creators and Freelancers producing AI-generated videos for clients.
Secondary Users	Small business owners and marketers creating promotional AI videos.
Out of Scope	Large enterprises, agencies, and users seeking direct AI video generation.

Problem Statement

Current Problem	Users struggle to choose the right AI tools and production workflow due to the large number of available platforms and lack of clear best practices.
Why Important	Trial-and-error wastes time, increases costs, and often leads to poor production quality.
Current Solution	Searching YouTube, Reddit, blogs, or asking general-purpose AI chatbots.
Why Current Solution Fails	Information is scattered, generic, and often not tailored to the user's specific goal, budget, or experience level.
Impact	Higher learning curve, unnecessary spending, lower productivity, and inconsistent output quality.
User Needs	
User Goal	Produce high-quality AI videos efficiently.
Expected Outcome	Receive a personalized production plan with recommended tools and workflow.
Time Saving	Reduce research time and avoid unnecessary spending on unsuitable tools.

Success Criteria	The user successfully follows the recommended plan and achieves better results.
Product	
Product Description	An intelligent recommendation platform that generates personalized AI video production plans based on user requirements.
Core Features	Personalized recommendations, workflow generation, AI tool comparison, production tips, pricing guidance.
MVP Features	Guided questionnaire, workflow generation, tool recommendations, pricing comparison, production tips.
Out of Scope	Direct AI video generation, API integrations with generation tools, enterprise collaboration features.
Value Proposition	
Why Choose Us	Save time, reduce costs, and receive personalized production recommendations instead of generic advice.
Unique Value	Personalized AI production recommendations tailored to each user's goals, budget, and experience level.

Competitive Advantage	Combines AI recommendations, workflow planning, tool comparison, and production best practices in one platform.
Core Value	
Core Value	Transform user requirements into personalized AI video production plans that enable better decision-making.
Assumptions	
No	Assumptions
1	Users struggle to select the right AI tools.
2	Users want personalized production guidance.
3	Users waste money due to poor tool selection.
4	Personalized recommendations provide more value than generic AI responses.
